PROFESSIONAL SUMMARY

Entry-level VAPT aspirant with hands-on lab experience in web application and network testing, vulnerability assessment, and security-tool usage. Seeking a VAPT / Penetration Testing internship or junior role.

TECHNICAL SKILLS

VAPT: Web & network penetration testing, vulnerability assessment, OWASP Top 10, CVSS, password-security auditing

Tools: Kali Linux, Burp Suite, Nmap, Metasploit, Wireshark, Hydra, SET, Zeek, Wazuh, VirtualBox, Git/GitHub

Languages / OS: Python, SQL, Bash, Windows, Linux (Kali, Ubuntu)

PROJECTS

- **VAPT – Metasploitable2:** Used Nmap and Metasploit in a lab to identify and validate 10+ exploitable CVEs; prioritized findings by severity and documented remediation in a VAPT report.
- **Web Application Testing – Burp Suite:** Intercepted and examined HTTP/HTTPS traffic; tested lab applications against OWASP Top 10 categories and documented findings with remediation advice.
- **Phishing Simulation & Awareness:** Built a simulated login page in an isolated lab to study phishing risks; recommended MFA and security-awareness training.
- **Password Security Testing:** Used Hydra for controlled password-policy testing and assessed endpoint credential-theft risks in a lab; identified defensive controls.
- **Network Scanning & Traffic Analysis:** Scanned 20+ lab hosts with Nmap and analyzed 100+ TCP/IP, DNS, and HTTP packets in Wireshark using filters.
- **Linux Shell Scripting:** Created Bash automation scripts for file-integrity checking, system-health monitoring, and IP discovery.

EDUCATION

MCA, IGNOU (Distance) — 2026–Present
BCA, CGPA 6.3, MDU / Shikshapeeth College — 2023–2026
Class XII, CBSE — 86% (2023)

CERTIFICATIONS & LABS

- Google Cybersecurity Professional Certificate; SOC Analyst Level 1 & 2 Masterclass — Selfcode, Udemy (Jul 2026)
- Cisco Networking Academy: Introduction to Cybersecurity, Networking Basics, Introduction to Packet Tracer
- TryHackMe: 15+ labs in Linux, networking, reconnaissance, and penetration-testing fundamentals

ADDITIONAL INFORMATION

Relevant coursework: Network Security, Operating Systems, Linux Administration, DBMS (SQL), Cryptography.
